

for the marine industry

Safety and reliability are the key drivers in the marine industry along with quality. GlobeTech provides the industry with specialized testing, calibration, measurements, validation and inspection services to ensure compliance with the stringent marine regulations, standards and legislation.

The marine industry is subject to strict regulations, standards and legislation. As a result, your organization must continually meet and improve on the highest levels of safety and reliability. We offer you a broad range of specialized services to help your business run safely and on budget. We create confidence in the delivery of services, and help you fulfill compliance.

As a leading provider of services, we offer expertise in regulation and standard compliance. Our experienced team of professionals, work closely with your departments to ensure you meet the required standards. Furthermore our testing and calibration laboratories are fully accredited and operate in accordance with the EN ISO / IEC 17025

GlobeTech broad range of services includes the following:

Calibration and Testing constitute fundamental operations of the marine industry. GlobeTech is dedicated to assist its clients in developing, implementing and maintaining the safety and reliability of as well as quality, and occupational health& safety on board. GlobeTech offers:

- Calibration of all type of instruments, equipment and analyzers on board, offshore, on-site and in Lab (scheduled periodic calibration)
- Testing of auxiliary equipment and tools including load testing
- Testing, Inspection and verification of jacks and hoists
- Inspection services
- Health, safety and environment measurements.

For such critical services you need a partner you can trust. With our accredited laboratories, you can be sure that you are fully complying with the stringent marine regulations, standards and legislation

Testing and Calibration are ongoing activities covering efficient safety, reliability as well as quality.

- ✓ Calibration - Monitoring processes is an important part of safety and reliability and involves the use of many instruments and equipment – from pressure and temperature transmitters and gauges to gas monitoring equipment, volume, flow, force to telecommunication instrument etc. Accurate calibration of these instruments is essential. Our instrument calibration service is specifically designed to meet the industry's calibration needs.
- ✓ Testing and Inspection – Testing and Inspection is integral to safety and reliability. With the marine industry increasingly subject to scrutiny, testing to ensure compliance with safety regulations, is a must.
- ✓ Health, Safety and Environment measurements as well as inspection are essential to demonstrate compliance to regulation. Our services are specifically designed to meet the industry's needs.
