

GLOBETECH LABORATORIES LTD was established in 2001 to provide services in the areas of Calibration, Precision Measurement, Testing & Product Certification, Inspection, Consultancy and Applied Research.

The Company's Aim is to substantially support the state's effort in developing the activity of Metrology in Cyprus whereas at the same time to offer its clients high quality services and complete solutions to their problems.

Drawing on a wealth of experience from various industries enables GlobeTech Laboratories to meet customer's requirements. With businesses having to place greater emphasis on quality, confidence in measurement is paramount.

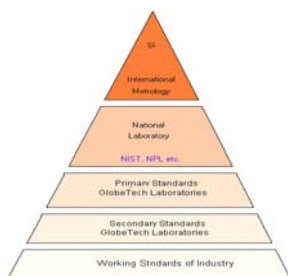

Highly qualified and motivated individuals, all with the necessary academic and professional experience, along with a state-of-the-art Accredited Laboratory enables GlobeTech to offer its wide range of specialised services conforming to the most exacting standards.

ACCREDITATION & QUALITY POLICY

GlobeTech Laboratories is the first Calibration laboratory in Cyprus that is Accredited* to ISO/IEC 17025 by RvA with accreditation certificate No K131. GlobeTech policy in accordance with its Quality Manual is "To continuously improve and upgrade the organisation, its procedures and the professionalism of all the company's personnel so that the services provided are of the highest quality standard".

The fully environmentally controlled Laboratory, which is supported by mobile units, is equipped with primary standards of high accuracy and operates in accordance with the international specifications set out by the guidelines of ISO 17025 and ISO 9001. Furthermore the company's professional and trained personnel follow documented procedures recognised by international organisations, for all calibrations and testing activities. The company is committed in providing professional and quality services throughout all its operations.

TRACEABILITY OF MEASUREMENTS

The major requirement of ISO 17025 is the traceability of measurements, which is fully fulfilled by GlobeTech Laboratories. The chain of calibrations with standards of higher accuracy assures the traceability of the services offered by our Laboratories to the National and/or International Standards.

* Scope: non-automatic weighing instruments
